TECHNOLOGY, AUTOMATION & MANAGEMENT, INC.

## TeAM, Inc. to attend the Defense Health Information Technology (DHITS) Symposium

Orlando, Florida; July 24—26, 2018

Technology, Automation & Management, Inc. (TeAM) has been invested in the improvements and successes of the Military Health System (MHS) since its inception and are pleased to announce that we will be attending the 2018 Defense Health Information Technology (DHITS) Symposium in Orlando, FL on July 24, 25 and 26, during. We are also excited to announce that we will have a booth at this year's event where we will be showcasing TeAM's new application, **LinkNxtGen**™ (beta)!

**LinkNxtGen**™

LinkNxtGen™ (beta) is a mobile and web application that captures detailed self-reported information on the processes and procedures, tools, and deliverables that your staff use to perform their work assignments as well as the organizations and individual customers that they interface with. This information makes it possible to identify staff that have the knowledge and experience to perform similar work on other assignments, and to identify areas of task overlap or duplication, with the objective of achieving maximum work efficiencies.

I would like to invite you to stop by our booth, #126 located by the DHITS Café, to learn more about LinkNxtGen™ (beta). At our booth you will have the opportunity to complete a quick survey for a pair of wireless headphones (supplies limited) as well as speak to a TeAM representative about TeAM's experience and capabilities, the LinkNxtGen™ (beta) application and its functions, and how we can assist you in achieving maximum project efficiencies.

We look forward to seeing you at DHITS!

v/r,

Charles G. Davis  
President/CEO  
Technology, Automation & Management, Inc.
