TeAM's Best In Class Solution

LinkNxtGen

Making it Easy to 'Trust the Process'

LinkNxtGen is a hybrid resource management, project management and process and procedure management tool based on Industry best practices. **LinkNxtGen** captures detailed, self-reported information on the processes, procedures, tools, and deliverables that staff use to perform their work assignments. **LinkNxtGen** can also capture the time spent on those processes and procedures. **LinkNxtGen** offers companies insights into their organization and customers by:

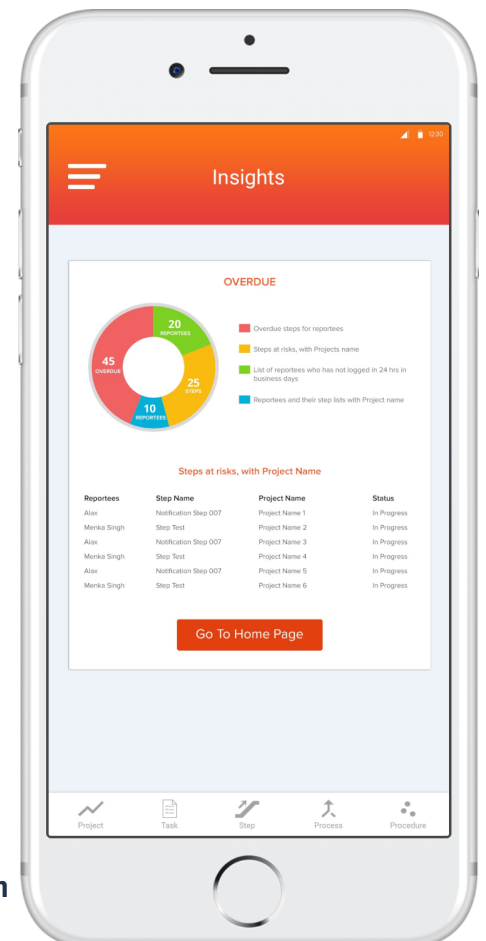

- Supporting all levels of the organization including strategic, mid-tier management, and operations
- Supporting continuous process improvement and recording all changes that occur within the system for future reference
- Storing over 125 predefined, commonly used Technical Labor categories in its databases with definitions

LinkNxtGen is available across multiple platforms (Apple OS, Android, desktop) and staff can use it anywhere and at anytime. **LinkNxtGen** offers a platform that can automate business processes and responses throughout the life cycle of any given project. Using Artificial Intelligence and Machine Learning, **LinkNxtGen** allows management to have transparency into the full life cycle of their organization by standardizing critical processes.
